EsmailiVerlaan, CCJ, E., Bijlani, C., Shimura, K., Prasad, V., Minatsuki, I.
Analytical evaluation of natural convective cooling of nuclear reactor enclosure structure

Seppen, J.J., Janssen, G.A.H.F.
Development and verification of numerical flow package for manifolds in combustion engines

Heydarpour, Jalal, Slotta, Larry S.
Modeling erosion and deposition due to suction and jet flows

Flood, S.C., Katgerman, L., Langille, A.H., Rogers, S., Read, C.M.
Modelling of fluid flow and stress phenomena during DC casting of aluminium alloys

Potocnik, Vinko
Modelling of metal-bath interface waves in hall-heroult cells using ester/phoenics

Agonafer, D., Moffatt, D.F.
Numerical modeling of forced convection heat transfer for modules mounted on circuit boards

Crespo, A., Hernandez, J.
Numerical modelling of the flow field in a wind turbine wake

Werner, C., Ulica F., J.I., Howell, F.S.
Numerical simulation of gas flow and chemical reactions in semiconductor processing equipment

Toro B, Francisco M., Meijer, Karel, Van Rijn, Leo
Quasi-3D and fully -3D modelling of suspended sediment transport
Dunstall, M.
Rotorua geothermal field

Irandoust, Said, Andersson, Bengt
Liquid film in Taylor flow through a capillary

Pressdee, Bill
Software model for CZ

Jubran, B.A.
Correlation and prediction of film cooling from two rows of holes

Bourgeois, T., Bui, R.T., Charette, A., Kocaefe, Y.S.
Mathematical modeling of an aluminum casting furnace combustion chamber

Anon
Computer models fluid flow in the steel industry

Anton, G., Büchler, K., Kückes, M.
A LED monitoring system for pulse height and time measurement with scintillation counters

Fleming, J.S., Tramschek, A.B., Abdul Husain, J.M.H.
A theoretical and experimental investigation of the flow of gas through reciprocating compressor valves.

Fogelqvist, E., Krysell, M., Öhman, P.
Evaluation of perfluoromethyldecalin as a deliberate tracer for the study of water mixing processes

Macilwain, C.
Keeping ahead of the flow.

Hoffman, N., Galea, E.R., Markatos, N.C.
Mathematical modelling of fire sprinkler systems

Heydarpour, J., Slotta, L.S.
Modeling erosion and deposition due to suction and jet flows
(1989).

Radosavljevic, D., Spalding, D.B.
Simultaneous prediction of internal and external aerodynamic and thermal flow fields of a natural-draft cooling tower in a cross-wind
(1989).
Simard, G Bui, RT Potocnik, V
Simulating complex industrial processes using PHOENICS

Malin, MR Younis, BA
Calculation of turbulent buoyant plumes with a Reynolds stress and heat flux transport closure.

Mahaffey, WA Mukerjee, T Rhodes, N Costes, NC
PHOENICS verification exercise simulating the flow in the Rockwell axisymmetric turnaround 180° duct (TAD) flow rig.

Malin, MR Proumen, N
Calculation of intermittent turbulent shear flow with a Reynolds stress transport closure.

Lamers, APGG van de Velde, R
Air flow patterns in ventilated rooms.

Montasser, W
Modelling of gas flow in a vertical chemical vapour deposition (cvd) reactor.

Maeda, T Matsunaga, F
A survey note on non-Newtonian fluid flow simulation.

Fukuyama, Y Nakajima, S Ohte, S
The application of PHOENICS to semi-conductor production process

Drake, SN Pericleous, KA
Numerical study of solar wall effects for the air movement and temperature distribution in the glass atrium of a building.
(1989) Presented at the Heat and mass Transfer in Building Material and Structure, ICHMT XXI Symposium, Dubronik September

Prakash, C Voller, V
On the numerical solution of continuum mixture model equations describing binary solid-liquid phase change.
Pulles, C Lamers, A
Comparison between two models of boundary layer development at a step change in surface roughness.

Blair, GP
Motion and mixing in the cylinder of a two-stroke engine prior to combustion.
(1989) Published in Heat and Mass Transfer in Gasoline and Diesel Engines.

Gadilhe, AY Fleury, BA
Wind pressure coefficients: a comparison between PHOENICS and wind tunnel results.

Nyberg, L
PHOENICS simulation of Stommel’s ocean.

Palacio, A Malin, MR Proumen, N Sanchez, L
Flowfield predictions of transonic and supersonic problems.

Burke, PD Burgess, J
*** A Coupled gas and solid flow, heat transfer and chemical reaction rate model for the ironmaking blast furnace.

Parsons, DJ
Modelling gas exchanger in a silage clamp using PHOENICS.

Gregory-Smith, DG Haekins, MJ
Modelling an axisymmetric curved wall jet with application to the coanda flare.

Rogers, S Katgerman, L
Particle tracking of solidifying metal droplets during gas atomization.

Flood, SC Kasai, K Katgerman, L
The modelling of heat and fluid flow in the dc casting of aluminium alloys.

Lamers, APGG
Influence of temperature dependent viscosity on laminar diffusion flames.
Kjaldman, L
Modelling of peat dust combustion.

Schutzbach, KC Mahaffey, WA Mukerjee, T
Numerical modelling of the intake manifold of a multicylinder automotive diesel engine.

Danckert, H Wersching, R Schockle, S
Three dimensional calculation of the water flow in a cylinder head.

Moffat, J Pericleous K
The modelling of two-phase flows using the general purpose particle tracking program GENTRA

Maeda, T Matsunaga, F
A Survey note on pressure boundary conditions.

Fraser, Sm Carey, C Kowaleski, G
LDA measurements in submerged nozzle flow.

Burdette, SR Coates, PJ Armstrong, RC Brown, RA
Calculations of viscoelastic flow through an axisymmetric corrugated tube using the explicity elliptic momentum equation formulation (EEME)

Dilawari, AH Szelely, J
Computed results for the deposition rates and transport phenomena for an MOCVD system with a conical rotating substrate.

Chyou, P Pfender, E
Behaviour of particulates in thermal plasma flow.

Schwarz, MP
Two and three dimensional methods of a gas stirred bath of molten pig iron.

Chyou, YP Pfender, E
Modeling of plasma jets with superimposed vortex flow.
Lawrence, SP
*** Turbulence modelling in naturally convecting fluids.
(1989) Published in Culham Laboratory, Abingdon, Oxford (Ref: CLMR292).

Serag-Eldin, MA
Employing SATELLITE and PHOTON as Input and Output devices for a non-PHOCISICS code.

Deiters, TA Mudawar, MA
Prediction of three-dimensional cooling rate for a spray quenched aluminium block.
(1989) Thesis/Purdue University W. Lafayette Indiana, USA

Morton, KW Paisley, MF
*** A finite volume scheme with shock fitting for the steady euler equations.

Magnussen, BG
Pollutant formation in gas turbine combustors based on the eddy dissipation concept.
(1989) NGC Projektmoete Trondheim, 9th November (Nordic Gastechnic Center, Project Meeting.

Richards, PJ
*** Computational modelling of wind flow around low-rise building using PHOENICS.

Malin, MR Younis, BA
Modelling Reynolds Stress and heat flux transport in turbulent buoyant plumes.

Ilegbusi, OJ Szekely, J
The effect of Ultrahigh magnetic fields on dopant distribution in CZ systems: a modeling study and comparison with asymptotic solutions.

Ilegbusi, OJ Szekely, J
Three dimensional velocity fields for Newtonian and non-Newtonian melts produced by a rotating magnetic field.
(1989) ISIJ International Vol. 29, No.6, pp462-468

Carey, c Gilchrist, AD Yilmaz, T
Laminar natural convection in a vertical channel.

Gidhagen, L Rahm, L Nyberg, L
Lagrangian modelling of dispersion, sedimentation and re-suspension processes in marine environments.

Svensson, U Ballfalk, L Hammar, L
A mathematical model of border-ice formations in rivers.
Svensson, U Gidhagen, L
Stratified estuary flows. Comparisons with laboratory experiments.

Qin, HQ Spalding, DB
The numerical simulation of shock initiation in solid explosives and gas inclusion.

Kirts, RE Kodres, CA
***Perturbations in atmospheric density caused by high rise buildings and their effect on astronomical observations- a case study.

Martin, JJ
Numerical solution to automobile passenger compartment cooling by use of PHOENICS.

Vardelle, M Pateyron, B Vardella, A Fauchais, P Saray, I
Characterization of a d c plasma torch with axial injection of powders.
(1989) University of Limoges Eotvos University, Hungary.

Cartwright R, Ilegbusi, OJ Szekely, J
A comparison of order-of-magnitude and numerical analysis of flow phenomena in czochralski and magnetic czochralski systems

Ilegbusi, OJ Szekely, J
Effect of externally imposed magnetic field on tundish performance.

Atkinson, E
Predicting the performance of sediment control devices at intakes.
(1989) Published by Hydraulics Research, Wallingford, Berks (Technical Note OD/TN 417 January)

Thomas, DL Hornby, RP
Natural convection cooling of a close-packed array of AGR fuel pins surrounded by graphite debris.
(1989) Published by Central Electricity Board and National Corporation Ltd.

Varnas, SR
The PHOENICS model of a low-current plasma arc.

Faghri, A Chen, MM Mahefkey, ET
Simultaneous axial conduction in the fluid and the pipe wall for forced convective laminar flow with blowing and suction at the wall.
Fung, MTR
Numerical solution for natural convection flow in the feedwater and decay heat penetrations of an advanced gas-cooled reactor.
(1989) Published by NNC ltd, Warrington, Cheshire.

Bowden, K
Kron's method of tearing on a transputer array with an application to the solution of a distributed system.

Qin, HQ Spalding, DB
The lagrangian hydrodynamical calculations in PHOENICS code.

Palacio, A Malin, MR
Simulation of supersonic flow past a double-wedge profile.

Irandoust, S Andersson, B
Simulation of flow and mass transfer in taylor flow through a capillary.

Ernola, P Hupa, M Kjaldman, L Oksanen, P
Detailed modelling of NOX emissions in fuel staging.

Huotari, J Kjaldman, L Paakkinen, K
Staged combustion of pulverized peat in a 5 MW single burner furnace.

Larsson, R
Implementation of an algebraic stress model for turbulence generated secondary currents.
(1989) PHOENICS Journal of Computational Fluid Dynamics and its Applications Vol. 1, No.4, pp 459-481. Published by CHAM.

Casterjon, A Ramos, E Lopez de Haro, M
Multiple solutions in benard convection.

Malin, MR Sanchez, L
A revised version of the k-kl turbulence model for near-wall flows.

Radosavljevic, D Spalding, DB
The use of PHOENICS to simulate three-dimensional effects in natural-draught cooling towers.
(1989) PHOENICS Journal of Computational Fluid Dynamics and its Applications Vol. 1 no.4, pp 409-458. Published by CHAM,
Chen, MM Faghri, A
An analysis of the vapour flow and heat conduction through the liquid-wick and pipe wall in a heat pipe with single or multiple heat sources.

Prakash, C
Numerical solution of continuum mixture model equations for solid-liquid phase change in binary systems: implementation on PHOENICS.
(1989) PHOENICS Journal of Computational Fluid Dynamics and its Applications, vo. 1, No.4, pp 502-515. Published by CHAM.

Vlachos, NS
Calculation of two-dimensional turbulent flow in a PC cabinet.

Malin, MR
Modelling the effects of lateral divergence on radially spreading turbulent jets.

Malin, MR
Analysis of turbulent forced plumes into stable an environment.

1988

Spalding, DB
Modifying a body-fitted coordinate grid during a PHOENICS computation.
(1988) PHOENICS Journal of Computational Fluid Dynamics and Its Applications Vol.1 No. 1 pp 110-140. Published by CHAM.
